WORK EXPERIENCE

- **VIETDEV STUDIO** **Ho Chi Minh City,**
  Fullstack Developer Sep 2024 - Jun 2025
  - ❖ Description: Led frontend development for a story community platform using Next.js SSR to optimize performance and SEO. Built responsive interfaces with Shadcn UI and Tailwind CSS, with efficient data fetching and server-state management using TanStack Query. Developed secure authentication and authorization with JWT and Django REST Framework, and set up CI/CD pipelines with GitHub Actions for automated testing and deployment. Created reusable UI components and custom React hooks to keep the interface consistent.
    - ➢ Highlights:
      - ■ Built and maintained a story community forum with over 10,000 users, supporting reading, community interaction and content sharing.
    - ➢ Technologies:
      - ■ Frontend: Next.js, React.js, Shadcn UI, TanStack Query, Tailwind CSS.
      - ■ Backend: Django, PostgreSQL, Python.

- **T.A CONSULTANT** **Ho Chi Minh City,**
  Fullstack Developer Jun 2025 - Present
  - ❖ Agricultural Cooperative SaaS Platform (public-sector client, private, in development): own the UI/UX design and frontend for 3 connected apps (admin console, farm management, public marketplace) from BA requirements.
    - ➢ Highlights:
      - ■ Built a shared design system (semantic tokens, data tables, permission-aware screens, loading, empty and error states) reused across all three apps.
      - ■ Delivered map-based plot management for cooperatives, drawing and editing field boundaries with Leaflet/MapLibre.
      - ■ Built the marketplace buyer journey: storefronts, product pages, cart, checkout and QR origin tracing.
      - ■ Added Playwright E2E and axe-core accessibility tests.
    - ➢ Technologies:
      - ■ Frontend: React 19, Next.js, TanStack Router/Query/Table, Tailwind CSS, Shadcn UI, Leaflet/MapLibre, React Hook Form, Zod, Playwright, Vitest
  - ❖ Document Editing & Management Apps: built Word, Excel and PDF editing and viewing with real-time collaboration (React.js, Next.js, Node.js, TipTap, Redux); implemented file conversion and processing, optimized for large documents, and synced data with TanStack Query.
  - ❖ E-Office Workflow (separate client): built business workflow features and secure APIs, reducing approval workflow time by 70% with an automated system.

  - ❖ Digital Library for a Pagoda: developed and maintained a full-stack system with book catalog management, borrowing records and role-based access control.
    - ➢ Highlights:
      - ■ Manages 40,000+ books with 1,000+ active users

        - Technologies:
            - Next.js, TanStack Query, Tailwind CSS, Shadcn UI
    - Other projects: built modern landing pages and CMS-driven websites using React.js, Next.js, and Node.js with responsive and SEO-friendly designs. Also developed scalable full-stack e-commerce solutions with secure backend APIs and database integration.
